

Sam Clinton Ogoti

00100, Nairobi • sclinton871@gmail.com • +254 791 541 572

PROFILE

Electrical and Electronics Engineer with strong foundations in power systems, circuit analysis, automation and embedded systems. Experienced in troubleshooting electrical and electronic equipment, power infrastructure, and control systems. Complemented by hands on experience in Linux systems administration, network configuration, and cybersecurity fundamentals. Skilled in TCP/IP networking, shell scripting, and microcontroller based system integration. Passionate about secure and reliable engineering solutions across electrical and digital environments.

EDUCATION

Bachelor of Science in Electrical and Electronics Engineering: Power Option

Major in Electrical and Electronics Engineering, Power Option

Minor Degree in Critical Thinking and Communication Skills

November 2020 to May 2025

Dedan Kimathi University of Technology, Nyeri, Kenya

Second Class Upper Division

EXPERIENCE

Kenya Academy of Sports KAS, January 12, 2026 to Present

Nairobi, Kenya

ICT Officer

- Maintain and troubleshoot Linux and Windows systems supporting administrative and training operations.
- Configure and manage LAN infrastructure including routers, switches, and wireless access points.
- Monitor network traffic, perform port analysis, and verify secure services such as SSH and HTTP services.
- Implement user access control, system backups, and cybersecurity best practices.
- Support electrical power backup systems, structured cabling, and electronic control devices.
- Perform hardware diagnostics, system upgrades and embedded device integration where required.

Kenya Airports Authority, January 2025 to April 2025

Nairobi, Kenya

Attachee

- Installed runway lighting circuits and configured Constant Current Regulators for airfield lighting systems.
- Enhanced operational reliability by ensuring accurate load calibration and secure termination practices.
- Installed series transformers at lighting points.

Audiovisual Communication Tech Ltd, April 2023 to August 2023
Attachee

Nairobi, Kenya

- Implemented smart lighting and energy efficient solutions for residential buildings.
- Installed and tested CCTV and other security systems.

Dedan Kimathi University of Technology, June 2022 to August 2022
Internal Attachment

Nyeri, Kenya

- Conducted simulations on power flow and control systems using MATLAB and Simulink.
- Assisted in maintenance of laboratory electrical systems, improving equipment uptime.
- Provided engineering software training in AutoCAD and MATLAB.

CERTIFICATIONS & TRAINING

- Odoo Free Learning Platform. Gained proficiency in Odoo ERP system and its workflow.
- Self paced training in MATLAB and Simulink.
- Self study in Linux systems administration, TCP/IP networking, and cybersecurity fundamentals.

PROJECTS

- IoT Flood Alert System. Developed a real time flood detection system using sensors and GSM modules.
- Power Flow Simulation. Simulated grid behavior and load distribution using MATLAB.
- PID Controller Tuning. Applied Ziegler Nichols method to optimize system response.
- Linux Network Lab. Configured SSH services, performed port scanning, and analyzed open services in controlled environments.

SKILLS

- **Technical:** Electrical installation, Troubleshooting, Smart Home automation, CCTV systems, Network configuration, Electrical circuit analysis
- **Systems:** Kali Linux, Shell scripting
- **Networking:** TCP/IP, Port scanning, SSH, Wireshark
- **Software:** MATLAB, Simulink, AutoCAD, LaTeX, Arduino IDE, Illustrator
- **Programming:** Python, JavaScript, Shell scripting
- **Soft Skills:** Teamwork, report writing, problem solving, adaptability

PASSIONS

- Electrical installation and automation
- Cybersecurity and system integrity
- Field research and innovation
- Community engagement and mentorship
- Continuous technical learning

LANGUAGES

- English: Proficient
- Swahili: Native
