PROFILE

Electrical and Electronics Engineer with experience in technical operations, electrical maintenance, low-voltage systems, and ICT support. Skilled in troubleshooting, AutoCAD, structured cabling, network configuration, Linux systems, and embedded systems. Experienced in coordinating technical works and supporting reliable engineering operations.

EXPERIENCE

Bomas International Convention Centre (BICC)

May 2026 – Present

Technical Operation and Maintenance Engineer

- Install and maintain weak current systems, including structured cabling and low-voltage infrastructure.
- Supervise on-site technical works to ensure compliance with project specifications and quality standards.
- Interpret AutoCAD drawings for installation, maintenance, and project execution.
- Coordinate technical operations and field activities with contractors and project teams.
- Troubleshoot, test, configure, and maintain electrical, electronic, and low-voltage systems.

Kenya Academy of Sports (KAS)

January 2026 – May 2026

ICT Officer

- Maintained and troubleshot Linux and Windows systems supporting administrative and training operations.
- Configured and managed LAN infrastructure, including routers, switches, and wireless access points.
- Monitored network traffic, performed port analysis, and verified services such as SSH and HTTP.
- Implemented user access controls, system backups, and cybersecurity best practices.
- Supported electrical power backup systems, structured cabling, and electronic control devices.
- Performed hardware diagnostics, system upgrades, and embedded device integration where required.

Kenya Airports Authority

January 2025 – April 2025

Attachee

- Installed runway lighting circuits and configured Constant Current Regulators for airfield lighting systems.
- Performed load calibration and secure termination practices to support reliable airfield lighting operations.
- Installed and tested series transformers at airfield lighting points.

Audiovisual Communication Tech Ltd

April 2023 – August 2023

Attachee

- Implemented smart lighting and energy-efficient solutions for residential buildings.
- Installed, configured, and tested CCTV and other electronic security systems.

Dedan Kimathi University of Technology

June 2022 – August 2022

Internal Attachment

- Conducted power flow and control system simulations using MATLAB and Simulink.
- Assisted with maintenance of laboratory electrical systems to support equipment availability.
- Provided engineering software training in AutoCAD and MATLAB.

EDUCATION

Bachelor of Science in Electrical and Electronics Engineering,

Minor: Critical Thinking and Communication Skills

November 2020 – May 2025

Dedan Kimathi University of Technology, Nyeri, Kenya

Second Class Upper Division

CERTIFICATIONS & TRAINING

- Odoo Free Learning Platform: Training in Odoo ERP systems and workflows.
- Self-paced training in MATLAB and Simulink.
- Self-study in Linux systems administration, TCP/IP networking, and cybersecurity fundamentals.

PROJECTS

- **IoT Flood Alert System:** Developed a real-time flood detection system using sensors and GSM modules.
- **Power Flow Simulation:** Simulated grid behaviour and load distribution using MATLAB.
- **PID Controller Tuning:** Applied the Ziegler–Nichols method to optimize system response.
- **Linux Network Lab:** Configured SSH services, performed port scanning, and analyzed open services in controlled environments.

SKILLS

- **Electrical & Engineering:** Electrical installation, electrical maintenance, weak current systems, site supervision, AutoCAD drawing interpretation, troubleshooting, smart home automation, CCTV systems, electrical circuit analysis.
- **Systems:** Kali Linux, Windows, shell scripting.
- **Networking:** TCP/IP, structured cabling, port scanning, SSH, Wireshark.
- **Software:** MATLAB, Simulink, AutoCAD, LaTeX, Arduino IDE, Adobe Illustrator.
- **Programming:** Python, JavaScript, shell scripting.
- **Soft Skills:** Teamwork, leadership, report writing, problem solving, adaptability.

PROFESSIONAL INTERESTS

- Electrical installation and automation
- Cybersecurity and system integrity
- Embedded and intelligent systems
- Engineering innovation and field research
- Continuous technical development

LANGUAGES

- English: Proficient
- Swahili: Native
